

DYNA-SSOR

Feel the squashing power of the Dyna-ssor and rejoice in its growling sustain!

JAMPEDALS.COM

Dyna-ssor

Whether you are after the squashing power of a dinosaur, capable of that vintage thumpy attack and endless sustain, or you just want to musically tame your dynamic range, the NOS CA3080 chip equipped Dyna-ssor will effortlessly nail it for you.

We are committed to creating well tuned circuits that allow our designs to feature the minimum number of straight-forward and responsive controls and sound great no matter how you dial them in. The Dyna-ssor is a great testament to exactly this effort!

It makes everything sound like "more"!

CONTROLS

1. **LEVEL** controls the Dyna-ssor's output level
2. **SUSTAIN** sets the amount of compression / sustain

SPECIFICATIONS

1. True Bypass
2. Works with a 9V battery or 9V DC adaptor (tip-negative)
3. Power consumption: 5 mA
4. Dimensions (jacks, pots etc. included): 11.1 x 7 x 4.8 cm / 4.3 x 2.7 x 1.8 inches
5. Weight: 230g / 0.5 lbs.

"I've been using the Dyna-ssoR on my recording sessions. It makes *everything* sound better!"

Adam Levy

"The Dyna-ssoR is excellent, that's the sound! I got rid of all my other 3080 compressors and I'll tour with it, you make me feel young again!"

Adrian Legg

"The Dyna-ssoR is designed in such a way that your tone seems to always remain intact no matter how much you compress it. It's brilliant and will only do you right."

Delicious Audio Blog

"The problem with compressors a lot of times they just squish so much, they snare the life out of the music, but this one's very transparent, very glorious and very musical!"

Greg Koch
